'JOCK'S WAGGIN' TONGUE

Vol. 4 Thur. April 25 No. 16
Jock McIntyre, Editor

If you are contemplating the purchase of a new Range, install a BEACH. Beach Ranges are built in various styles and finishes to meet the individual demand for price and quality. They enjoy an enviable reputation for their economical and dependable performance in heating cooking and baking.

Marshall Wells Paint Sale will be held until April the 27th. Don't Delay. Order today. Use the paint Enamel and Varnish most people in Western Canada prefer.

Bill and Jack Gorshe are back looking their best and 'arin' to go but can't.

It's hard to beleive but old Doc Jock is getting better and better at repairing grease guns, bring yours in and get them working properly.

Bert Beingsner was in town last week greeting old friends and looking the best.

Our stock of small tools is complete and every price guaranteed and you just don't buy them for less than our prices.

Our very best wishes to a couple of grand guys Flo and Bud.

We like to please and it pleases us to know that we have pleased another customer.

Hugh and Clara Frame were district visitors last week both are feeling and looking fine.

Win Penn and North Star oils and greases are "Still the Best".

Champion's April moisture is over three inches. No seeding of any consequence done.

Teacher: "Spell 'Straight'"
Johnny: "S-T-R-A-I-G-H-T"
Teacher: "Correct, What does it mean?"
Johnny: "Without ginger ale."

Shower In Honor Of Miss Flo Gill

Miss Flo Gill, bride elect, was the guest of honor at a shower sponsored by Mrs C Williamson, Mrs G Taylor, Mrs C McLean and Mrs M Sisson, was held in the Savoy Hotel on Saturday the 20th. The shower was held in the gaily decorated dining room from three o'clock in the afternoon until six o'clock in the evening. About seventy-five of Miss Gill's friends were present.

Among numerous other gifts a lovely Cedar Chest, was presented by Mrs C A Williamson, in a short address, from the district.

In the course of the afternoon a short program was enjoyed. Those taking part were Miss Marjorie Ditto, Miss Virginia Farmer and Miss G McLean of Nobleford.

A delicious lunch was then served at a table which had as a centerpiece a large doll dressed as a bride.

The sponsors wish to thank Mrs Cemulani for the use of her hotel dining room and others who helped in making the shower a success.

Rainfall Heaviest In Years

Rainfall has reached an all time high. Nearly 3.06 of moisture have fallen since April 1st. Since wednesday last there has been a snowball of upwards to four inches and almost a steady drizzle up to this time of writing.

According to the report given us by Mr Clever the Searle Grain Elevator Agent the average for a period of years is 0.86 inches. Last year at this time we received only 0.08 inches.

The side roads are nearly impassable and the highways are sloughs of mud with the ditches on either side filling in the lower spots.

The farmers are beginning to get a little anxious to get to work on the land, several have mounted lights and generators on their tractors making it possible for them to operate day and night once it becomes dry enough so as to allow field work.

This year is now the latest that seeding has started for the last ten years.

Carmangay Farmers Boost Irrigation

This wet spring has not fooled the Carmangay farmers into thinking they are in a wet country for they are still pushing for irrigation.

Three different projects are under discussion, objections have been raised against two of the proposals but the third is forging ahead.

The first was to bring water from the Highwood River along the old stock watering canal into Mosquito Creek and then by ditch to Clear Lake. From there it would be taken to Carmangay fields. Considerable opposition to this scheme was met from farmers considerably farther north who did not want the ditches running through their holdings. A second project was the ditching of water

from the Lethbridge Northern main Canal. The same opposition was raised by the southern farmers.

A third project is now under consideration, namely, to bring water from Highwood River to Frankburg Lake and thence to two canals, one north and one south of the Little Bow.

It is hoped that this arrangement will not effect the holdings of the local district so widely on account of the more limited scope of the plan.

The local committee are drawing up plans to lay before the P F R A at Regina.

The regular monthly meeting of the Ladies Aid met at the home of Mrs P Gatenby today at 2 o'clock.

Wedding Bells For Gill — Sanford

A quiet wedding was solemnized at the Anglican Church at Vulcan on wednesday April 24 at 10 o'clock am with Canon Winters officiating when Flora Gill, daughter of Horace E Gill and Stanley M Sanford, son of Mr Marshall Sanford, were united in the Holy Bonds of Matrimony.

The bride was dressed in a blue knitted travelling suit with accessories to match, and corsage bouquet of cream rose buds.

The bride and bridegroom were attended by their respective fathers, and left for Calgary immediately after the ceremony for a short honeymoon. On their return they will take up their residence at Nemiscam Alberta where the groom is

Cont. on Page 4

Riding and Hiking in The Clouds

TWO highlights of the summer season in the Canadian Rockies will be the more than usually interesting outings planned by the Trail Riders and Trail Hikers of the Canadian Rockies. Their mid-summer excursions on horseback or by foot into beauty spots off the beaten path will be especially attractive this year to Canadians who will stay away from the United States because of high monetary exchange and to Americans barred from the holiday resorts of Europe and attracted to Canada by favorable exchange.

The Trail Riders will hold their five-day outing from July 26 to 30, following a spectacular trail from Marble Canyon in British Columbia to Lake Louise. The Trail Hikers of the Canadian Rockies will have one central camp for four days in the magnificent Egypt Lake and Simpson Pass summit area. Their outing is from August 2 to 5.

Both these organizations have a world-wide membership. Anyone can join, the only qualifications being a love of the open and the willingness to share common pleasures with others. On the trail, members sleep in tents or Indian teepees; simple but satisfying meals are dished up in the cook-tent; trained packers and guides do the heavy work. All unnecessary frills are eliminated, however, bringing the outings right down

to the hearty basic pleasures of the out-of-doors and keeping the costs at a minimum. J. M. Gibbon, Windsor Station, Montreal, secretary for both organizations, reports a growing interest in this type of holiday and expects record numbers to take part this year.

Other special entertainment planned for this year in the Banff-Lake Louise district includes such fascinating events as the Indian Days' celebrations at Banff, July 18-21; Banff Golf Week, August 18-24; Banff School of Fine Arts, August 1-31; the annual Stampede at Calgary, July 8-13; and the annual camp of the Alpine Club of Canada at Glacier Lake Camp, July 14-29.

- Editorial -

War Charities

It has been suggested that this district organize under the War Charities Act. The object being to make one annual collection for these charities and disperse the funds to the Red Cross, Canadian Legion, Salvation Army and the Y M C A. This would do away with having more than one collection each year. Other districts in the province have organized in this manner and we feel that something along this line should be done in Champion and surrounding districts.

Since wheat is the principal crop in this district, it was suggested that these contributions be made each fall after harvest.

Exchange For Tourists

Many Tourists from United States will soon be on Canadian highways and byways and steps are being taken by the Foreign Exchange Control Board and the Canadian Travel Bureau to insure that every Canadian merchant, hotel and Service station operator, etc. know the strict regulations requiring him to pay the full ten percent on every American dollar offered by a visitor. Steps are also being taken to advise American visitors of their rights to the premium.

Placards will be displayed in retail stores, hotels, customs offices and elsewhere advising the American tourist that his dollar is worth \$1.10 in Canada and see that he gets the full amount.

It is understood that arrangements have been made to keep the Foreign Exchange Control officials informed from day to day of the amounts of money being spent by tourists in Canada as well as the amounts of Canadian currency that Americans bring to this country.

LETTER TO THE EDITOR

To the Editor,
Champion Chronicle.
Dear Sir: Please Publish the
following:

Land owners in the Municipal District of Harmony No 128 think \$10.00 per acre, per year is a little high as a business tax.

In publishing letters to the editor, The Chronicle does so as a medium of service to its subscribers and it should be clearly understood by everyone that statements or sentiments expressed in such communications are those of the writers only and not those of this paper.

Crows and Scarecrows

So you're going to let the crows see where your tatties are, was the salutation of a shrewd Scots parson to a member of his flock, who trudged along the road bearing the traditional scarecrow to be erected in a newly planted potato patch. The remark must have penetrated, for on his return journey the parson saw the scarecrow lying deserted in the ditch by the roadside.

Crows are crafty creatures and it is by experience rather than instinct that they associate a scarecrow with some tempting forbidden fruit. Crows are long lived and consequently have long memories.

Pests far worse than crows prey on farmers' crops remarks B. Leslie Emslie, chemist agronomist. Crows may be seen and heard, shot or shoo'd away, though not to stay, while these other pests are micro organisms whose ravages, however, can be plainly seen at harvest time.

Many of the microscopic pests are fungi, some of which may infest the soil, but most of them are carried on the seed itself for instance, scab and rhizoctonia of potatoes, seed rot of corn, bunt of wheat, the smuts of oats, covered smut and stripes of barley.

ENGLAND IN THE 12th CENTURY

The development of the art of brewing as we have traced it since the Egypt of 500 B. C., through the period of the Greeks, Roman, Spaniards, Gauls and German, all have adopted beverages made from barely, we now come to early English history: William of Malamesbury informs us that in the Reign of Henry II the monasteries were remarkable for the strength and purity of their ales, brewed from malt prepared by the monks with great skill and care.

AND TODAY

Modern people are increasingly aware of how BEER contributes to better living. It offers companionship when you are alone . . . fellowship when among friends and a sensible flourish to the hospitality that graces your home.

A NEW AND BETTER OIL

For Your Car, Truck and Tractor

ONLY IMPERIAL OIL USES ALL FOUR

of these modern, scientific refining processes in the manufacture of the New Marvelube

Vacuum Distillation — separates gummy, black substances from the oil which in an engine, cause heavy carbon deposits.

Phenol Solvent Refining — removes undesirable materials from the lubricating oil, the presence of which causes oil to sludge badly.

Solvent Dewaxing — separates the wax from the oil, permitting it to flow freely at low temperatures, which, in turn, allows the engine to turn over easily in cold weather.

Contact Clay Treatment — gives the oil its final polish and removes the last trace of impurities, ensuring the production of an oil of highest quality.

The New Marvelube, most modern development in engine lubrication, is now ready for your car, truck and tractor. It was developed in Imperial Oil research laboratories, and was specially engineered to meet the requirements of today's engines, and to stand up under the higher speeds, temperatures and pressures at which they operate.

Marvelube has always been a leader among motor oils: The New Marvelube retains all the previous high qualities—in addition it brings you these two definite advantages:

1. Economy. Under the high temperatures and pressures at which today's motors operate, the New Marvelube stands up longer. Definitely you use less oil.

2. A cleaner, livelier engine. New, scientific refining methods give this oil new standards of purity never before possible. The engine of your car, truck or tractor stays clean and lively. Wear is reduced. Upkeep costs come down.

This new oil will save you money on this summer's operations. You'll save oil. You'll save upkeep costs. You'll get more power from the fuel you use. Ask your Imperial Oil agent about the New Marvelube.

The **NEW Marvelube** MOTOR OIL

SOLD BY IMPERIAL OIL AGENTS AND

DEALERS EVERYWHERE IN CANADA

A New Imperial Oil Prdt.

New refining methods give quantities never before obtainable

A recent survey shows that the petroleum industry leads in scientific reasearch work and this is one reason why the quality of motor fuels and oils is continuously being improved. A notable improvement in motor oils is announced in this issue of this paper by Imperial Oil agents and dealers in this district is said to last longer, give better protection of engines and more economy of operation because its refining has been carried further by new scientific methods developed by long research work in the company's big reseasch laboratories.

The new oil is said to be made by using the four modern refining processes. By using all four of these processes, instead of a smaller number, Imperial scientists announce that they have obtained qualities never before possible in a motor oil.

Each refining process used removes some of the undesirable properties from the crude oil so that the oil finally produced is a pure lubricant, containing nothing but the qualities
